

MPA PROGRAM INTERNSHIPS

Students who do not have significant professional experience may complete an internship program and enroll in PPA 585 - Public Policy and Administration Internship. This internship course provides three semester units of credit, which is in addition to the thirty-six units required for the degree or the eighteen units required for a certificate. The internship course may be repeated for one additional semester. Students in the internship course are normally required to work for twenty hours a week in the internship position, or an equivalent number of hours in a different time period.
