ALTER 
Anti-Gravity Treadmill

The AlterG treadmill is a state of art anti-gravity treadmill, which allows patients to reduce their body weight by up to 80% while they walk or run.

Its Differential Air Pressure technology applies a lifting force to the body that reduces weight on the lower extremities and allow precise unweighting.

Whether it is an athlete trying to build mileage or someone with degenerative joint disease wanting to walk without pain, our AlterG can be beneficial for weight bearing issues.
