

# **MORAL FIBER**

## **Process Engineer – Los Angeles**

moral fiber is a fast-moving, high-growth chemical technology and fashion startup that is developing a process to turn old clothing into new textiles. Our highly dynamic, collaborative team is composed of the world's brightest and most unique scientists and engineers.

### **The job:**

We are looking for a highly motivated engineer who will develop and help scale our technology for making brand new yarns from old clothing. You will be working with R&D engineers and scientists to lead the scale-up of the process. This will involve pilot plant experimentation, process engineering/improvements, design, and construction of our demo plant. Ideally you have 2 - 4 years experience working in a top tier process R&D group, and an incredible fascination and love for chemical engineering.

### **We will provide:**

Above average compensation  
Equity ownership package  
Greenspace IP and publication opportunities  
Mentorship by some of world's best chemical engineers
