Product Management Intern – PC Gaming (HyperX)

The Intern in this position will be a product champion for our HyperX product portfolio. Responsibilities will include supporting product managers in the product development stages. Assist in the creation of product marketing materials for events and content for special projects. Research and follow the market's problems and needs. Analyze market trends and data provided through various reports. Create and manage R&D database of reference products and packaging.

Qualifications:

- Strong understanding of the product design life cycle and the technologies involved in product development.
- Excellent analytical skills.
- Skilled in interpreting abstract ideas into a viable product.
- Ability to aggregate information from various places and build relationships with key stakeholders to get the information needed.
- Must be able to successfully manage multiple responsibilities and changing priorities in a fast-paced, highly dynamic work environment.
- Excellent communication and presentation skills with the ability to communicate to diverse technical and non-technical audiences.
- Exceptional problem solving skills.
- Solid team player who can take on new opportunities and challenges.
- Proficient in Microsoft Word, Excel, & PowerPoint.

Requirements:

- Currently enrolled as a sophomore or Junior.
- Knowledgeable of the latest gaming products, technologies and games.
- Passionate gamer with in-depth knowledge of games and gaming peripherals
- Applied knowledge of User Experience and Research methods and tactics.
- Ability to work on site at least 20 hours a week.

Why Join Kingston?

- Work with the latest technology and devices.
- Business casual work environment.
- We are a company that believes investing in employees is essential to our success.
- Regarded as **"One of the Best Companies to Work for in America"** by Fortune Magazine.

HyperX is the high-performance product division of Kingston Technology, the world's largest independent memory manufacturer. HyperX is the proud sponsor of more than 20 gaming teams globally and the main sponsor of Intel Extreme Masters and Dreamhack festivals.
