

You will have take home quizzes due on Tuesday, March 13, 2007 and Thursday, March 15th that will include exercises similar to some the following questions. You do not need to turn in your answers to these questions.

Drill Section 10.1.

Practice Gauss-Jordan elimination: page 547 #17-35.

Your quiz due March 13 will include a system with a unique solution and a system with no solution.

Your quiz due March 15 will be to solve a problem with an infinite number of solutions, and write the general solution for that system (see Example 4 p age 543).
