

Rubric: Boolean operators

Learning Outcome: The student accessed needed information effectively and efficiently

Student demonstrates all elements of the skill: 4
Student demonstrates most elements of the skill: 3
Student demonstrates half of these elements: 2
Students demonstrates very little familiarity of the skill: 1
Student demonstrates no knowledge of the skill: 0

The student constructs and implements effectively-designed search strategies_____

The students identified keywords for the information needed_____

The student can define the term “Boolean operator” _____

The student constructed a search strategy using Boolean operators_____

The student understands the purpose and effect of Boolean operators_____

The student constructed a search strategy using truncation_____

The student constructed a search strategy using phrase searching_____

The student implemented a search strategy in various information retrieval systems using different user interfaces and search engines, with different command languages, protocols, and search parameters_____

The student used keywords and/or strategy in more than one databases_____

Total points_____
