(not mandatory)***

COVID-19 Health and Safety Requirements

In response to the COVID-19 pandemic, CSULB has implemented health and safety protocols (see [COVID-19 website](#)) that follow the guidance of local, state, and national public health authorities. As a member of our campus community, you are expected to follow all campus policies, including COVID-19-related requirements. These apply to anyone who is physically present on University grounds or participating in any CSULB-related activity:

- All students visiting CSULB facilities or engaging in any in-person university experience on campus must wear appropriate face coverings while indoors.
- All students are required to be fully vaccinated and boosted to physically access CSULB-related on- or off-campus in-person experiences unless approved for a legitimate exemption.

Exposure to COVID-19

Definition of exposure: You have come into close contact (closer than 6' for more than 15 minutes) with someone who has a confirmed case of COVID-19.

Consequences of exposure: In the event of exposure to someone who has tested positive for COVID-19, you should self-monitor for symptoms, test for COVID-19, and vigilantly use face coverings indoors or outdoors.

Testing after exposure: LBDHHS (Long Beach Department of Health and Human Services) will continue to offer COVID testing this fall M/W from 12 pm—3 pm adjacent to the bookstore. The first day they will be testing on campus is August 22nd.

If You Test Positive for COVID-19

If you test positive for COVID-19, you are not allowed back on campus for at least 5 days. You may return to campus starting on Day 6 as soon as you get a negative test.

If you test positive for COVID-19, or if you believe you may be positive but have not yet been tested, or if you know of a student who you believe may have contracted COVID-19, please [fill out this form](#) to notify Student Health Services.
