

Mission

The mission of the CSULB Health Science DrPH Program is to provide the best graduate education and training in a multiethnic and urban environment to develop highly competent professionals and leaders in public health and technology, global health, and health policy and management.

The program strives to afford excellence in teaching, conduct research, and provide service to local, regional, national, and international populations living within the surrounding communities, while making a significant contribution towards increasing health equity for underserved populations.

Financial Information

Financial assistance is available from the University. Students are referred to the Office of Financial Aid to explore opportunities for support of graduate education.

Among the listed opportunities are the following:
