

HDEV

HUMAN DEVELOPMENT

CALIFORNIA STATE UNIVERSITY LONG BEACH

A minor in Human Development complements any CSULB major, offering students core knowledge and essential skills to make a difference for individuals, families, and communities in a diverse and changing world.

HDEV classes combine **psychology**, **biology**, **anthropology**, and **sociology** to prepare students for rewarding career paths in therapy, social work, counseling, health, education, advocacy, business, research, and more.

- ✓ **2 More HDEV Classes:** HDEV 190 or higher **(6 units)**

CHECK OUT OUR EXCITING **GE** CLASSES!

Classes to take in your first 2 years:

HDEV 180

Lifespan Human Development (D,E):

Learn how humans develop & grow from conception to death, exploring life stages like a psychologist, sociologist, anthropologist, and biologist.

HDEV 190

Elementary Statistics (B):

Complete your stats requirement in a supportive class environment (one of the highest pass-rates for a stats class in the college!)

HDEV 307

Approaches to Childhood (D,E):

Discover childhood from conception to early adolescence, learning how children develop & grow across different sociocultural contexts

HDEV 327

Adolescence & Emerging Adulthood (D):

Dive into the murky waters of adolescence & explore the many complex factors that guide our journeys into adulthood

HDEV 357

Adulthood Through Aging (D,E):

Travel the paths through adulthood, discovering physical, psychology, & sociocultural aspects that shape the course of our adult lives.

Transferring in?

These classes are for you!

HDEV 300

Death & Dying (D,E):

Explore the social, cultural & individual aspects of death, rituals around death, survivorship & grief, from biological, legal, religious & ethical perspectives

HDEV 303

Health Disparities (B,D):

Examine health disparities across diverse populations, discovering differences in prevalence, risk & protective factors through an interdisciplinary lens

HDEV 308

Pseudoscience vs. Science (B):

Uncover how and why media and social institutions support unscientific claims, and explore the impact of data on important issues in human development
