

Enrollment FTES Planning Target

Fall 2026 overall enrollment is currently projected to be 1127.6 (3.0%) less FTES than Fall 2025. According to the most recent information from the Chancellor's Office campuses will be allowed to be as much as three and a half (3.5%) over target. As always, we should concentrate on serving students well. Providing students with seats in needed classes is a top campus priority. We are deeply appreciative of the hard work of college enrollment managers in the difficult task of delivering needed classes in this time of resource limitations

Class College	Fall 2025 FTES at Census	Fall 2026 FTES Targets	Change from prior term	Percent Change
Business & Business Administration	3749.6	3492.36	-257.24	-6.86%
Education	1841.8	1985.59	143.79	7.81%
Engineering	3576.6	3505.61	-70.99	-1.98%
Health and Human Services	6535.7	6245.18	-290.52	-4.45%
Liberal Arts	11567.6	11077.68	-489.92	-4.24%
Natural Sciences & Mathematics	5525.3	5588.63	63.33	1.15%
The Arts	3687.6	3457.9	-229.7	-6.23%
University Programs	147.4	151.06	3.66	2.48%
University Total	36631.6	35504.0	-1127.6	-3.08%

Enrollment planning targets are forecasts of enrollment and are intended to assist colleges in anticipating enrollment changes in order to plan schedules that provide needed sections for students.

College enrollment targets are based upon our university enrollment forecasting model that incorporates many parameters (the campus enrollment target, size of undergraduate and graduate continuing student populations, continuation rates, average unit loads, new student admission cohorts, and trends) and college average shares of prior term enrollments. Spring enrollment trends are influenced both by typical college differences in fall to spring patterns (such as freshmen moving out of basic English and Math classes) and by differences in spring trends in colleges (such as an increase or decrease in continuing majors). Targets are expressed in full time equivalent students (FTES, 15 undergraduate student credit units = 1 UG FTES and 12 graduate student credit units = 1 graduate FTES).
