

**Bachelor of Science in Public Health,  
Option in Health Advocacy and Policy**

(This new degree option was approved by the CSULB Academic Senate on September 10, 2025, approved by the President on September 24, 2025, and approved by the CSU Chancellor's Office on October 17, 2025.)

(120 Units)

The Bachelor of Science in Public Health, Option in Health Advocacy and Policy is designed for individuals interested in developing a comprehensive education in public health principles, combined with specialized training in health policy analysis, advocacy strategies, and the policymaking process. Students gain a solid foundation in epidemiology, environmental health, and health behavior, while also developing skills in crafting compelling narratives, leveraging data to inform policy decisions, engaging communities in advocacy efforts, and navigating the complexities of health policymaking at various levels of government. The program prepares graduates for careers in government agencies, non-profits, advocacy groups, healthcare systems, and research institutions, where they can contribute to advancing health equity, shaping public policies, and promoting the well-being of diverse populations.

**Admission Criteria for the Bachelor of Science in Public Health Degree Option in Health Science**
