1 California State University, Long Beach Policy Statement 2 10-08 3 March 24, 2010 4 5 6 Undergraduate Academic Advising 7 This policy was recommended by the Academic Senate on February 11, 2010 8 and approved by the president on March 3, 2010. 9 10 11 This policy defines the philosophy, goal, objectives, responsibilities, and purposes of the undergraduate academic 12 advising program at California State University, Long Beach. 13 14 A. Philosophy 15 Academic advising is an educational activity that is inextricably linked with student learning and success. Advising 16 helps students integrate personal development and intellectual learning, which are the pillars of a baccalaureate 17 education. It also enhances students' academic performance and ensures their progress toward graduation. Faculty 18 members mentor students in myriad ways, including conversations before and after class and during office hours. In 19 addition, although recognition is given to the critical role that staff professional advisors play in the development of 20 students throughout their higher educational experiences, this policy addresses those involved in more formal advising 21 activities, such as mandatory freshmen advising, graduation checks, and requests for exceptions to academic policy. 22 23 B. Goal 24 Undergraduate academic advising is an integral component of the mission of CSULB to promote students' academic 25 excellence and personal achievement. The goal of this policy is to ensure that all students are effectively served by 26 comprehensive academic advising throughout their university careers. 27 28 C. Objectives 29 The advising program of CSULB, as a whole, should meet the following objectives: 30 It should facilitate intellectual and personal development by helping students to

- 1. choose, clarify, plan, and achieve educational and career goals;
- 2. understand the relationship between academic experience and career opportunities/objectives;
- 3. identify academic and personal skills that need to be acquired or enhanced to achieve educational goals; and
- 4. access and assess information and obtain guidance for post-baccalaureate studies.

It should enhance academic performance by helping students to

- 1. develop a strategy to monitor progress and development;
- 2. select courses to integrate educational and personal goals;
- 3. explore academic options to make meaningful short and long-term decisions; and
- 4. increase awareness of the full range of campus programs and services.

It should ensure progress toward graduation by helping students to

- 1. understand and follow the university's policies and procedures leading to graduation (e.g., requirements for completion of General Education, majors and programs, and other university requirements); and
- 2. complete and submit appropriate forms and petitions necessary for academic progress (e.g., request to graduate, petitions for withdrawal, academic warning, independent study, grade changes, and incompletes).

49 D. Responsibilities

Students, faculty, staff, and administrators share the responsibility to work collaboratively to achieve academic
 advising goals. To accomplish the objectives, students' advising experiences should follow a chronological pattern.

52 Ideally students would obtain regular academic advising throughout their academic careers. 53 Minimally, advising revolves around the following five benchmarks: 54 1. When students enter the university, either as first-year or transfer students; 55 2. When students enter the major, minor, or program; 56 3. If and when the student experiences academic difficulty, including warning and possibility of disqualification; 57 4. When students move into upper-division standing and closer to graduation; and 58 5. As students prepare to graduate and move beyond their studies at CSULB. 59 60 E. Students are responsible for: 61 1. Familiarizing themselves with requirements for the major or program, as well as graduation and other 62 requirements, contained in the appropriate CSULB Catalog and other university publications; 63 2. Attending a new student orientation program prior to the first semester of attendance; 64 3. Declaring a major as required by university deadlines; 65 4. Maintaining a personal academic advising folder and taking it to every advising appointment; 66 5. Obtaining academic advising upon entering the university; upon entering any major, minor, or other programs; 67 upon entering upper division standing, and upon preparing to graduate; and 68 6. Seeking advising if and when experiencing academic difficulty, including warning and possibility of 69 disgualification. 70 71 F. Faculty and staff advisors are responsible for preparing and understanding how to meet the 72 advising needs of students. 73 This minimally includes: 74 1. Attending advising orientations or in-service trainings provided by the department/program, college, or 75 university; 76 2. Acquiring familiarity with the CSULB Catalog and all current advising materials, such as program planners, 77 road maps, class schedule, etc.: 78 3. Developing proficiency in using electronic advising tools (e.g., CMS or other Degree Progress Reports and 79 the university website, including but not limited to the Academic Advising Center and Enrollment Services 80 websites); 81 4. Understanding campus advising resources as listed in the CSULB Catalog and on the CSULB website; 82 5. Providing accessible advising services to students by scheduling and maintaining regular office hours 83 specifically for the purpose of advising activities: and 84 6. Providing supportive academic advising assistance by responding to the differing needs of CSULB's diverse 85 student population. 86 87 Faculty advisors shall accomplish the goals of academic advising by: 88 1. Assisting students in making their own informed and responsible decisions, setting realistic goals, answering 89 students' questions, and making students aware of the possible short- and long-range consequences of their 90 choices: 91 2. Providing information regarding the wide range of programs, services, and educational opportunities at the 92 university that may be pertinent to students' educational objectives; 93 3. Informing students of relevant policies, procedures, and programs of the university; 94 4. Identifying practices to assist students to shorten their time to degree (e.g., identifying courses that can 95 double count for general education and major requirements and identifying equivalent transfer courses for 96 the major when appropriate); and 97 5. Informing advisees of special opportunities of interest such as internships, employment opportunities, and 98 educational enrichment. 99 100 G. Colleges, departments/programs, and college-based advising units are responsible for: 101 1. Coordinating and providing oversight of department/program advising activities in their unit such as drafting 102 and implementing college advising policies and procedures; 103 2. Developing consistent and transparent guidelines for workload compensation for faculty members who assume 104 advising responsibilities such as reassigned time commensurate with the number of student advisees in the 105 department or program: 106 3. Determining whom in the college is responsible for academic advising; 107 4. Designating liaisons with important campus advising resources;

108	5. Developing criteria for those who serve as advisors;
109	 6. Keeping advising materials current and available to advisors and students;
110	
111	7. Designating an area on department bulletin board or electronic equivalent for public display of advising
112	procedures and information and a list of faculty advisors, with their office hours and office locations;
112	8. Maintaining electronic means for disseminating advising information to students and faculty; and
	9. Creating, publishing, and implementing assessment plans that include measurable outcomes (e.g., time to
114	degree completion data) and information on how the results will be used for program improvement.
115

d. Oversee periodic and thorough reviews of academic advising culminating in a report to the Academic Senate.

All advising programs and units shall undergo regular program reviews. University-wide programs and units will fall under the purview of either the Program Assessment and Review Council or the program review process in the Division of Student Affairs. College offices will be responsible for departmental advising and college-based advising units. The associate vice president for undergraduate studies and academic advising will collaborate with advising units and programs to communicate assessment plans and results-based improvements.

EFFECTIVE: fall 2010
