

WHAT IS THE CANVAS STUDENT QUICK START MODULE?

All courses in Canvas contain a “**Student Quick Start Module**,” which provides students with convenient access to instructions they may need to set up their account and participate in your course. These include a PDF guide, short video tutorials, and links to further resources. If you do not want students to view the module, you are free to remove it.

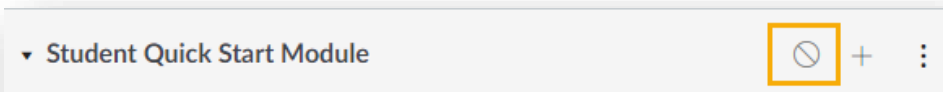

View the Student Quick Start Module:

1. From your Canvas Dashboard, open your course shell.
2. From the left-hand menu, select **Modules**.
3. Select any of the page links within the *Student Quick Start Module* to view the content:

Remove the module (2 options):

- A. Select the **green checkmark** next to the module title so that the check is replaced with a no-symbol. This action is called *un-publishing*, and it makes the module invisible to students:

- B. You can also delete it by selecting the **triple-dot button** and then **Delete**:
