

Emergencies at CSULB & Your Response

This presentation discusses responses to possible emergency situations at CSULB.

CSULB Emergency Contact Info

Is there an emergency?

Do you need campus police or paramedics?

Dial 911
from your cell or campus phone.

Emergency Phones

Dial 911 for police, fire, or medical emergencies.

Emergency phones are available on campus.

Learn where they are located on the common routes you walk and inside the buildings where you work or attend classes.

Look for them outside in the Upper Campus Quad, Brotman Hall Bus Stop, Parking Lots and Parking Structures, Athletic Fields, and more.

- Hallway/Elevator Phones
- Public Phones
- Blue Emergency Phones 

Emergency Phone Locations

Emergency phones are located in parking lots and walkways, as well as in many campus buildings, such as:

Academic Services (AS)

- Ground floor/east side
- Elevator, no public access – see desk

Microbiology (MIC)

- Elevator
- 2nd Floor near MIC-105
- 4th Floor walkway

Peterson Hall 1 (PH1)

- 2nd Floor

Fine Arts 4 (FA4)

- 2nd Floor, near FA4-200
- 3rd Floor Hallway
- Elevator

Library (LIB)

- 4W, 3W reading room
- Employee elevator
- #2, #3 elevator

Molecular Life Sciences Center (MLSC)

- 1st Floor Hallway

Physical Education (PE)

- Hallway across from PE-62
- Outside Patio, west wall
- Main hallway by PE-57
- Women's Locker Room/north, east, west walls
- Women's Locker Room/north wall @ Lot E3 Exit

Medical Emergency

- Dial 911 immediately. You will be connected to University Police:
 - ✓ Describe the problem: nature and severity
 - ✓ Provide estimated age and sex
 - ✓ Look for emergency medical ID

You protect your life and others by:

- Following directions of instructors and emergency personnel.
- Assisting persons with disabilities.
- Evacuating the building IF REQUIRED.

If you are in class and the fire alarm goes off:

- Take all personal belongings.
- Exit the building at the nearest exit that is clear and safe.
- **Do not use elevators.** Use nearest stairs to the ground floor, then exit the building.
- If someone needs assistance, and you can help, do so.
- **Do not play superhero.** Sometimes the best help is to report the need for assistance and location to emergency personnel.
- Once outside, head to the designated Evacuation Rally Point for the building or area you are in. Stay with your class.
- Do not return to the building until building has been cleared for re-entry.

Rally Points

Classes will evacuate to a Rally Point (red dots) nearest their classroom.

Note:

Parking Lot E7 and the HSCI vehicle parking area are **NOT** Rally Points.

If an all-campus evacuation is required:

People at Rally Points will be directed to Staging Areas and campus will evacuate sequentially from designated staging areas to designated evacuation routes.

If you are in class and there is an earthquake:

- **Drop, Cover, and Hold** if indoors.
- Evacuate the building only if a fire alarm is sounding or instructed by emergency responders.
- Find open space if outdoors.
- After shaking stops, check yourself and others for injuries.
- Report any injured, trapped, or missing persons to emergency responders.

Threats or Violent Behavior

- If a person becomes disruptive (violent, threatening, bizarre behavior) notify your instructor. Also contact Campus police **911**.
- If behavior of others is threatening and disruptive, **you have the right to leave** this classroom **or block entry** to anyone who is a threat to the well being of the members of this class.

If there is an active shooter:

Options and Best Practices—what you can do to be safe:

Run

- Leave the area quickly.
- Do not use the elevators.

Hide

- Lock/blockade the door. Stay quiet out of the shooter's view. Silence cell phones, keep phone light hidden.
- Move away from windows.
- If safely possible, call 911 with list of people.

Fight

- As a last option, fight back as a group to incapacitate the shooter.
- Create distraction: yell or throw things to help provide a moment's advantage.

Active Shooter Safety Video

RUN. HIDE. FIGHT.

CSULB has an active shooter safety video titled “[Run. Hide. Fight.](#)” that instructs what to do if you find yourself in an active shooter situation.

If there is a bomb threat or other suspicious object:

- Remain calm.
- Call 911.
- Do not handle suspicious objects.
- Details are important. Be Attentive:
 - ✓ What does it look like?
 - ✓ Is a time of explosion known?
 - ✓ Where is it?
 - ✓ If reporting a caller, listen for: gender, approximate age, tone of voice, any accents, any background noise.

Hazardous Materials Spills

If you are contaminated:

- Remove clothing and rinse 15 minutes
- Dial University Police: 911

For small spills not involving immediate danger:

- Confine spill
- Stay out of contaminated area

For spills involving a material you are UNFAMILIAR with:

- Evacuate the area immediately
- Move crosswind to avoid the fumes
- Follow Building Marshals' directions
- Stay with your class

CSULB Emergency Operations Plan

The CSULB Emergency Operations Plan is written to conform with California State and Federal Law governing emergency operations.

You are invited to review the CSULB Emergency Operations plan at:

emergency.csulb.edu
