

Policies for Organizations

1. COVID-19 Vaccines and Testing Requirements

All Club Sports & Recreation participants (students and coaches) and organization members involved in physical activities (including, but not limited to dancing, stepping, and strolling) are required to have a completed a vaccine series for COVID-19 that is approved for emergency use or full approval by the FDA or World Health Organization and is in alignment with all University vaccine policies. In addition, Club Sports & Recreation students and organization members involved in physical activities will be required to participate (students and coaches) in frequent, scheduled testing. The University is creating a safer environment during practices, competitions, and travel when individuals are in close daily contact with each other and reduce the need to cancel any scheduled events.

Participants seeking an exemption to vaccine requirements for religious or medical reasons must follow the University process for exemptions. Information for an exemption may be found here:

<https://web.csulb.edu/divisions/students/immunizations/exemptions.html>. A non-vaccinated student participant with exemption may be subject to additional testing, procedures, and policies.

2. Community Member Participation

Until COVID restrictions have been completely lifted, Club Sports and Recreation teams are not permitted to have community members on teams to ensure health and safety of University community members. Requests for exception to this policy must be put in writing to the Dean of Students at studentdean@csulb.edu with appropriate justification and documentation for review. The Dean of Students will provide a response within 5 business days.

All students must adhere to published CSULB polices and regulations, local and state, and other applicable regulation, guidelines, laws, and orders.

Please note that this policy may be updated as new information regarding the best methods to contain COVID-19 is received.
