

# Parking and Transportation Advisory Committee

## Purpose and Scope

Transportation to and from the CSULB campus significantly impacts the student, faculty and staff experience as well as the experience of surrounding communities. It also makes up 60% of the campus carbon footprint. CSULB Parking and Transportation Services is committed to providing multiple transportation options, managing parking demand, and encouraging the use of sustainable transportation to provide access to the University and ensure a positive commute experience.

Parking and Transportation Services is forming an advisory committee of liaisons from various campus constituencies that will consist of the following positions:

- Director of Operations (Committee Chair)
- Director of Parking, Transportation and Support Services
- Manager, Parking Field Services, University Police
- Director, Academic Facilities, ARSP
- Design and Construction Services representative
- ASI representative(s) (undergraduate)
- ASI representative(s) (graduate)
- Student(s) living on campus
- Student(s) living at Beachside
- Full-time tenure track faculty member
- Part-time lecturer
- Disabled Student Services representative
- Staff Liaison associated with Special Events
- Sustainability task force representative

In addition to the standing committee members made up from various campus constituencies the Committee also includes representatives from campus community partners such as Long Beach Transit, the City of Long Beach, and LA Metro. Parking and Transportation Advisory Committee members are asked to commit to one 90 minute meeting held every other month, to allocate time to speak with other constituents in their area(s), research and recommend innovative solutions and provide feedback to the committee in an effort to improve the parking and transportation experience for the campus community and to help Parking and Transportation Services meet the following goals:

- Provide equitable access to parking for students, faculty and staff;
- Provide meaningful transportation programs and services for our students, faculty and staff that support sustainable commute choices and reduces CSULB's carbon footprint;
- Address general parking issues and concerns.
